

TRENCH'N edge™

Landscape and Irrigation Trencher

1-800-483-3437 | www.trenchnedge.com

“The only trencher that cleans up after itself!”

The TRENCH'N edge™ trencher is the most versatile of its kind on the market today. It has a 9 HP engine and an innovative front pivot wheel which allows the trencher to cut a 9" radius through the toughest of soils.

This trencher can be used to install irrigation lines and all types of landscape edging, such as stone, brick, plastic and modular concrete edging.

“Eliminate the high cost of clean-up by blowing material directly onto tarps.”

- ▶ Dual-side discharge into or out of bed so material won't ruin existing lawns or planting beds.

- ▶ No clean-up costs means increased profits and happy customers.

“No clean-up costs means increased profits and happy customers.”

Hardscaping

Install any type of rock, boulders, modular concrete retaining walls, brick, plastic or metal edging, and foundation footings. The only trencher to cut multiple side-by-side trenches without filling the existing trench.

Brick edging

Retaining walls

Pathways

SelectEdge

Irrigation

Install conventional sprinkler systems, waterlines, draisile, TV and communication cable, low voltage lighting and septic wastewater dispersion piping.

Trenched material onto tarps

Pipe into trench

Dirt back into trench

No mess, no fuss,
no clean-up

TRENCH'N edge's patented features make installation quick and easy.

- ▶ **Dual side discharge** chute provides flexibility in discharging material 6 to 12 inches away from the trencher. A cutting blade centered between the rear wheels keeps the trench clean and uniform during tight radiuses.

- ▶ **Wide Shark teeth** lower overall maintenance costs by reducing the need to replace an entire blade. A spring-loaded blade allows the blade to float up and over underground obstructions such as rocks and large tree roots.

- ▶ **Adjustable depth** allows you to change the depth at any time. There is no need to change blades when adjusting the depth.

- ▶ **Circle - Trencher** cuts tight circles and curves down to 18" in diameter. Cuts a clean uniform flat bottom trench for concrete and brick edging.

Specifications

Cutting Blade Options

Landscape: Up to 5" wide x 6" deep each pass - 9 HP

Angled: Up to 5" wide by 5" deep

Irrigation: 2.5" wide x 7" deep each pass - 9 HP

Irrigation: 2.5" wide x 12" deep each pass - 13 HP

Sub-surface drip/Low voltage line: 1" wide x 5" deep - 9 HP

Trencher Teeth

Up to 8 replaceable Carbide Bits mounted in forged steel holders or shark teeth for rocky soils

Engine / Speed

9 HP or 13 HP

Up to 35 feet per minute, varies with ground conditions and type of cutting blade

Dimensions

Length: 60" x Height: 31" x Width: 26" - 9 HP

Length: 70" x Height: 31" x Width: 26" - 13 HP
